

EST 2000

The EST2000 is a laser-based unit/institutional, indoor, multipurpose arms trainer for individual and crew served weapons including pistols, rifles, shotguns, machine guns, antitank weaponry and grenade launchers. The system displays targets, terrain and weapons effects in a real time presentation on a screen 26 feet from the firer. The firing soldier experiences an approximation to the actual weapon's sound, weight and recoil. It provides training for marksmanship, static unit collective training, "shoot don't shoot" judgments, and provides extensive after-action review (AAR) support. For scheduling please call 210-808-4270, 210-464-8441 or email [EST 2000](#) or [EST-2000](#)
